

GUIDE TO MAJORS AT YESHIVA: MUSIC

Choosing a major can be stressful, but it is important to understand that you can pursue almost any career regardless of which major you choose. While there are some exceptions, most entry-level positions simply require general transferable skills—those that can be learned in one setting and applied in another. Relevant experience through internships and activities is generally more important to employers than a major. It is best to choose an area that you find interesting and where you have the ability to do well.

What is the Music Major?

Music majors study the basics of music theory and composition, music history and literature, and music performance in order to give them an appreciation of the pleasures and an understanding of the role of music in the arts and humanities. The study of music has been at the heart of the humanities since the beginning of the Common Era and has traditionally exerted a major influence upon cultural, creative and intellectual life. Participation in the arts and humanities contributes significantly to broadening a person's vision and understanding of the human condition.
