PROCEDURES FOR APPLICATION OF PA POLICIES (A3.01)

The policies and information contained in the PA Program handbook apply even if not specifically stated in individual course syllabi or other program documentation. These policies apply to all students, principal faculty and the program director, regardless of location (A3.01).

Many of the policies provided in the handbook are the same as those found in the Katz Graduate Academic Catalog and are referenced accordingly. However, due to the specific nature of the Yeshiva PA Program curriculum and educational structure, PA students are held accountable to the standards and procedures outlined in the PA Program handbook. In cases where the PA Program's policies differ from those in the Catalog, this handbook will take precedence over the general school policies.

Furthermore, some policies at affiliated clinical sites may also be in addition to those outlined in the Yeshiva PA Program Student Handbook. Such policies are provided to the students during the orientation to the clinical year, electronically in the Exxat system, and/or from the sites themselves (A3.01).
