Expanding and Enhancing Faculty Research in STEM and Health

From: Paul Russo, Dean, Katz School of Science and Health & University Vice Provost

Date: May 25, 2022

Re: Request for Proposals AY 2022 – 2023 (September 2022-August 2023)

As the Katz School expands its research contributions in STEM and Health, we are announcing research support for Katz School faculty as well as for collaborations between all YU faculty and Katz faculty/students. The research can be theoretical, empirical, applied, or clinical.

Required Items:

- Projects must produce tangible outcomes that raise the visibility of the Katz School in STEM and health sciences.
- Projects must include Katz School graduate students either as research assistants, interns, or part of their academic requirements (i.e., thesis).
- Projects must be in the following priority areas:
 - Artificial Intelligence (theoretical, empirical, and application)
 - Cybersecurity
 - Biotechnology and Life Sciences
 - Applied Social Media and Analytics
 - Health Sciences

This initiative is intended to stimulate new research and expand existing research projects that raise the visibility of the Katz School through publication and conferences and set up faculty to apply for externally funded research, while simultaneously creating research opportunities for full-time Katz graduate students. Projects are intended to result in scholarly publication and grant applications. The primary goal is not to simply create class/capstone projects for students.

Awards will range from a minimum of \$1,000 to a maximum of \$5,000. The average award will be \$3,000, with larger amounts awarded based on significance of the work to the Katz School, potential for future work/external funding, and number of full-time graduate students included. Awards may be combined with the Provost's research support if it is clear how the original project is extended and why the additional funds are needed.

The Katz School
of Science and Health

Proposal Format

See the application form below. All submissions must be approved by the proposer(s)' program directors, department chair(s) and, then finally, dean(s).

Evaluation of Proposals¹

Proposals will be evaluated using the criteria outlined below:

- Connection to one of the priority areas. (20 pts.)
- Clarity on intended publication as well as ability to scale of the project and potential to attract external funding. (20 pts.)
- Appropriateness of the project assessment plan. (20 pts)
- Feasibility of the plan, timetable, budget, and team. (20 pts.)
- Katz full-time graduate student engagement. (20 points)

Reporting

If funded, award recipients must prepare a status report on the progress at the end of the fall and spring semesters covering accomplishments to date, upcoming work and requests to change the overall scope of the plan. In addition, awardees must present their work to the university community in a poster session planned for fall 2023. These are seen as opportunities to disseminate results and to inspire other faculty members to propose new projects.

Future Awards

Often, projects are expected to be completed within one year. However, there may be projects that span multiple years and others that produce such good results that the Katz School will request further work. Please indicate any intention to apply for multi-year funding. Include a rationale for extending the length of the project.

Key Dates

- Completed applications are due by Monday, July 11, 2022, submitted electronically to katz@yu.edu.
- Awards will be announced by August 10, 2022.
- Work must begin by September 12, 2022.
- Approved purchases must be completed by December 19, 2022.

Questions may be submitted via email to katz@yu.edu.

¹ Applicants may be contacted for additional information or to request minor revisions to the document.

AY 2022 - 2023 Proposal Instructions

Proposal Outline

Each application shall include a .1) project cover sheet, 2.) a project narrative (see specific requirements) of no more than two pages, 3.) a budget plan of not more than two pages, and 4.) an appendix with bios of all participants. To facilitate the blind review process, please refrain from using any personal identifiers in the body of the proposal.

1. Cover Page

- Project Title, One Paragraph Abstract (not more than 250 words), Principal Investigator(s), Amount Requested, and Signatures.

2. Specific Requirements (not more than 2 pages):

- Rationale – Why should the project be done? Explain how the proposed project will improve scientific knowledge, technical capabilities, and/or clinical practice.
- Purpose, relationship to priorities, and/or hypotheses. Where will the results be published.
- Design and Methodology –What will be done, how, and by whom (i.e., participants, procedures, measures, and analytic plan)? Identify major milestones and create a brief task-list/timeline including who is responsible for the specific tasks. Describe the evaluation design for your project. What will you do to determine the success of your project?
- Outcomes/Benefits – What are the expected outcomes of the project in concrete terms? Estimate the number of people (full-time graduate students, research participants, and others) who will benefit directly from the project and describe the expected benefits to them. How will the results be disseminated?
- Partners – List any employers, professional organizations, industry partners, government agencies, community-based organizations, other colleges, etc. involved in the project. Describe the roles and responsibilities of each partner. Attach a short letter from each, confirming their commitment to the project.

3. Resources and Budget (Not more than 2 pages)

- Create a project budget that explains the funding need. Include an explanation of any potential external funding sources to support future work. Budget format below.
 - If you applied to other internal (i.e., Provost Research Grant) or any external funding please specify.

4. Appendix for Bios

- Brief bio for each participant.

Budget Form

Awards will range from a minimum of \$1,000 to a maximum of \$5,000. The average award will be \$3,000, with larger amounts awarded based on number of students, programs, and potential for future work/external funding. Awards may be combined with the Provost’s research support if it is clear how the original project is extended and why the additional funds are needed.

Excluded expenses:

- Purchase of general equipment already available on campus (e.g., laptops, audiovisual equipment or departmental equipment that should be purchased via request to the university)
- Full-time or permanent employees cannot be hired under the grant.
- Summer salary or stipends.

Allowable expenses:

- Stipends to full-time Katz graduate students (research/lab assistants).
- Stipends to adjuncts involved in the research project.
- Specialized equipment not available through other funding.
- Research needs not available through other funding.

A. Part-time Personnel (Titles)	Number	Rate	Fringe Rate	(A) Amount	(B) Other Funding Sources ²	Total Cost (A+B)
			10%			
			10%			
			10%			
Subtotal, Personnel:				\$	\$	\$

B. Non-Personnel Costs (Itemize)	(A) Amount	(B) Other Sources ²	Total Cost
