Mandatory YU Trainings

(Wurzweiler's Faculty Handbook 2025)

2.1 Mandatory Security Awareness Training

YU requires all its personnel to take monthly Security Awareness Training. Training to improve cybersecurity awareness helps YU keep its data safe and provides valuable security practices that can be applied in everyday life. Cyber threats are growing exponentially, and keeping our valuable data secured has never been more challenging.

At the beginning of each month, users receive an email from **no-reply@securitytraining.yu.edu** with the link to their training dashboard.

Watching these training videos as you receive them will help you stay vigilant. If you fail to complete all the training, you will lose access to all IT resources, which includes your YU email and canvas account.
