Configuring Ensuring your Computer is Ready

Prior to using Teams to receive a call, make a call or attend a meeting, please ensure your headset is configured properly. If you do not have a headset, please complete the form to request one.

1. Ensure your headset is plugged into your computer
2. Click your profile picture at the top of the app, then select Settings > Devices
3. In the Devices section, your headset should appear in the
4. Under Audio Settings → choose 3-Jabra EVOLVE LINK MS
5. Under Speakers, choose 3-Jabra EVOLVE LINK MS
6. Under Microphone, choose 3-Jabra EVOLVE LINK MS
7. Under Secondary Ringer, choose Speakers/Headphones (Realtek® Audio)
8. Your final settings should be shown as follows:

![Audio Settings Configuration](image)

9. Choose Make a test call
10. What will occur is that you should hear the test in your headset. When prompted, record a test message. Wait a few second and your test message will play back to you.
11. At the end a summary will display on the screen. Your test call results should show all green. If you do not have a camera, then all will show a red alert icon. This is ok. Choose Close.

Answering a call

1. When someone calls you, you'll get a notification in the corner of your screen that lets you accept or decline the call. You can answer by clicking on the phone icon on your screen or your YU issued headset.

![Phone Icon](image)

2. Click the Phone icon to answer with audio only.
3. Click the Video icon to accept the call and enable video as well.

Adding someone to a call

Multi-party calling is allowed. A maximum of 50 people can be added to a call.

1. To add someone new to a group call, select the Show participants icon in your call controls.

![Show Participants](image)

2. Then type their name or phone number in the search box and hit enter. This will add them into the call.

**Microsoft Teams - Calling Quick Reference Guide**

**Starting a Call using the Dial-Pad**

The Dial-Pad can be used to Dial someone who is outside of the University.

1. Navigate to the section
2. Using the DialPad, type the number that you wish to call.
3. To start call, click the

**Starting a Call using the Contact**

The contacts section is shared with Outlook. You can add a contact in the Teams or within Outlook.

1. Navigate to the section
2. Click in the Right side of screen
3. Choose in the Right side of screen
4. At the Add to Contacts box, begin typing the user’s first name, a list will appear and select the appropriate person.
5. Click Add
6. Scroll down and locate the contact and click the phone icon to make a Teams Call.

**Starting a Call using History**

History shows all calls that were made. To call a person from History,

7. Navigate to the section
8. Click
9. On the person you want to call, click the
10. Choose Call back

**Starting a Call with a Yeshiva or Someone with Teams**

The Dial-Pad can be used to Dial someone who is outside of the University.

1. From any place in Teams, click in the command window at the top center.
2. Type /Call [Enter], Begin typing the person’s name. Select and Hit Enter or hit the right arrow to start the call.

**Checking your Voicemail**

The easiest way to check your voicemail, is from the Teams Client Calling Pane. However, you also will receive an email with the voicemail attached and transcribed to text (if possible).

You are not able to check your voicemail from a cell phone or phone without using the Teams client

1. Navigate to the section
2. Click on Voicemail
3. Voicemails will be displayed in chronological order, click on the name or number.
4. Click the to play the message.

**Important Notes:**

- You can change the play speed by clicking on the down arrow next to and selecting the speed.
- The Transcription is the right-hand side of the screen.
Transfer a Call
Microsoft Teams provides the ability to transfer the call to another user. There are two types of transfers: Transfer (aka. Blind Transfer), and Consultative Transfer.

Transfer (Blind Transfer)
1. To transfer a call, select More options ⋮ > Transfer in your call controls.
2. Type the name of the person you want to transfer the call to and select them. To finish, select Transfer.
3. Click the drop-down arrow in the Transfer button to see more transfer options.
4. Choose Work to transfer the call to their Teams number, or Work voicemail.

Consultative Transfer
Consultative transfer allows the person to consult with the person prior to transferring the call. This may be done via the phone or using Chat. (Physical phones do not allow chat).

1. To transfer a call, select More options ⋮ > Transfer in your call controls.
2. Type the name of the person you want to transfer the call to and select them. To finish, select Consult.
3. Two options for consultation:
   a. To type a message to the person who you wish to transfer the call to and hit the send button .
   b. Click the Telephone Button . Once you consult with the person , click the Transfer.
4. If the person does not want to talk choose Stop Consulting.
5. If they wish to send to their voice mail, Transfer the call using the Transfer instructions and in Step #4, choose Work VoiceMail.
**Microsoft Teams - Calling Quick Reference Guide**

**Call Park**

Microsoft Teams offers many different types of clients from mobile, desktop or web (using Chrome). Therefore, a call can be picked up from any device. You may want to transfer the call to another device. This is done by using Call Park.

By using Call Park, the call is temporarily put on hold so it can be picked up on another device by using a Pickup code.

**Picking up a Parked Call**

1. Navigate to the section
2. Click **Speed dial**
3. Click **Parked calls**
4. At the Pick up a parked call, enter the # and then click **Pick up**

**Putting a call on hold**

1. To place a call on hold, click **More actions ...** in your call window.
2. Then select **Hold**. Everyone in the call will be notified that they've been put on hold, and you can continue your call by clicking **Resume**.
3. People on hold (including you) won't be able to see or hear anyone else on the call. Screen sharing is suspended, too. Everything will return to normal once you resume your call.

**Understanding whether a person is available for a call**

You should be aware of the person’s status before calling, because calls may not be completed because the person’s status is set to Do Not Disturb.

<table>
