YOUR PRE-HEALTH COMMITTEE LETTER

WHAT IS A PRE-HEALTH COMMITTEE LETTER?

A Committee Letter is a very personalized letter written by the Pre-Health Advisor on behalf of the university. This letter, along with your individual recommendation letters, comprise the packet which the Pre-Health Office transmits to the health professional schools you've listed on your application.

Professional schools expect Yeshiva College applicants to submit a Committee Letter as part of their dossier. This Pre-health Committee recommendation is based on information you submit, including—

- ✓ your Pre-Health Application,
- ✓ the outcome of the Pre-health interview,
- ✓ the AMCAS/AADSAS application,
- ✓ your transcript
- ✓ a close reading of the letters of recommendation submitted in support of your application.

Failure to meet deadlines listed on the Committee Letter Registration Form can indicate a lack of commitment on your part to joining the profession and can give the Pre-health Committee reason to question your readiness to take on serious professional responsibilities.

You will be interviewed before you have submitted your AMCAS or AAADSAS application, but your Committee Letter will not be sent until your online application is completed. The Committee Letter is then finalized and transmitted during the six-week verification process

In general, you need to have submitted all the necessary documents requested to the Pre-Health Office. These include:

- ✓ Self-Evaluation Form
- ✓ Pre-Health Application
- ✓ 1-hour meeting with Pre-health Advisor
