## **Professional Assistant**

I'm looking for 2 Professional Assistants to help me develop multiple Projects. I currently have a private practice which is psychoanalytic. The job is ideal for people with a MSW or similar Mental Health degree. I am looking for personnel that are creative, have a sense of how to successfully use social media, have research interests and have a strong desire to help people. I've recently discovered a methodology to treat autoimmune conditions such as Cancer, MS, Alzheimer's, Parkinson's and several other life threatening disorders. I will need to have this information disseminated to medical practices as well as establish research as is necessary.

The job will be on site in White Plains however some of the work can be done via Zoom or phone. If you are in the field I can also provide supervision and training.

So, hope to hear.
