

RevCore Recovery Services of Manhattan, LLC is seeking an entry-level LMSW or MHC-LP for its new mental health program, located in Brooklyn. This position is an excellent opportunity for new clinicians to develop their skills in the areas of assessment and treatment planning, psychotherapy, crisis intervention, complex care management and discharge planning. These services promote hope and recovery, and they will focus on client choice and achievable outcomes. These services will be delivered primarily in the offices of the program but will be provided in the client's natural environment in crisis situations, and when engagement and outreach services are being provided.

*Assessment and Treatment Planning* Clinicians will provide assessment and treatment planning services in partnership with each client on an ongoing basis. A complete and thorough assessment of both the mental illness, as well any co-occurring substance use disorder, will be accomplished. The outcome of this service will be much more than arriving at a DSM-V diagnosis. The outcome will be the development of a comprehensive, individualized, culturally sensitive, goal-oriented treatment plan. It will identify the mental illness, the symptoms and the effects on the person's ability to function in major life roles.

*Psychotherapy* Clinicians will provide this service individually, in groups and in families. These goal-oriented face-to-face interventions between staff and clients will address the functional deficits of the client as they progress towards the objectives agreed upon in their treatment plan. RevCore tailors our services and practices to the client's needs. Clinicians utilize evidence-based interventions in individual, family, and group psychotherapy. Practices include but are not limited to:

- Cognitive Behavioral Therapy
- Seeking Safety
- Dialectical Behavior Therapy
- Motivational Interviewing
- Anger Management
- Parenting Skills Training
- Family Psychoeducation/Psychoeducation
- Wellness Self-Management

Experience with these interventions is desirable, but not required. RevCore believes in supporting employees' professional development and provides access to excellent training and robust clinical supervision.
