EVIDENCE BASED MENTAL HEALTH PRACTICE

SWK8882

SPRING 2016 ON-LINE

Instructor: Professor Susan E. Mason, PhD., LCSW

Doctoral Students: You are required to do all the readings listed for this class. Please do NOT participate in online discussions with Masters level students. All comments should be directed towards me by e-mail. You are required to log in to the online platform (Moodle) at least one time each week.

COURSE DESCRIPTION

This course is aimed at developing the knowledge and skills necessary for working with individuals with a diagnosis of serious mental illness using recovery-oriented evidence-based practices. It is designed for MSW students and MSW mental health practitioners. Students will become familiar with evidence-based practice, within a recovery-oriented paradigm, as a general approach to practice as well as specific evidence-based interventions to use for individuals with a diagnosis of serious mental illness. It is assumed that students will have a basic knowledge of serious mental illness as a pre or co-requisite; however a review will be provided. Students will learn to examine research literature to determine the various levels of support for specific interventions and essential principles for translating research into practice. In addition, they will identify the appropriate treatment outcomes that reflect effective, quality, mental health practice. Each evidence-based practice presented will also be examined for its utility with diverse groups. Providing assessment and treatment to a diverse group of individuals with a diagnosis of serious mental illness is the focus of this course and will be discussed in detail.

LEARNING OBJECTIVES

At the completion of this course students will be able to:

1. Critically review the research literature to determine the level of evidence that
exist for a practice (including distinguishing between evidence-based practice, best practices, and areas with emerging research knowledge).

2. Translate research, identified in the literature as demonstrating effective treatment outcomes; into practice principles for intervening for individuals with a diagnosis of serious mental illness (include the role and measurement of fidelity).

3. Describe strategies to evaluate and monitor client progress, over time, on treatment outcomes that are appropriate for specific interventions for individuals with a diagnosis of serious mental illness.

4. Demonstrate a working knowledge of the recovery paradigm as it relates to working with individuals with a diagnosis of serious mental illnesses.

5. Demonstrate an understanding of the value and importance of using self-help strategies with consumers of mental health services.

6. Describe the importance of using evidence-based practices with individuals with a diagnosis of serious mental illness.

7. Discuss for which type of clients the evidence base on a given practice exists.

8. Discuss principles for adapting interventions for use with diverse groups of clients.

9. Describe unique components of assessment and treatment planning that are relevant for each evidence-based practice, client trauma history, and coexisting substance abuse problems for people with serious mental illness.

10. Describe the role of social work values and ethics in evidence-based practice with individuals with a diagnosis of serious mental illness.

11. Describe principles of technology transfer for organizational change in mental health.

**PLAGIARISM**

Students should remember that the School will not condone plagiarism in any form and will sanction acts of plagiarism. A student who presents someone else's work as his or her own work is stealing from the authors or persons who did the original thinking and writing. Plagiarism occurs when a student directly copies another's work without citation; when a student paraphrases major aspects of another's work without citation; and when a student combines the work of different authors into a new statement without reference to those authors. It is also plagiarism to use the ideas and/or work of another student and present them as your own. It is not plagiarism to formulate your own presentation of an idea or concept as a reaction to someone else's work; however, the work to which you are reacting should be discussed and appropriately cited. Any student who can be shown to have plagiarized any part of any assignment in this course will automatically **FAIL** the course and will be referred to the Associate Dean for disciplinary action that may include expulsion.

**HIPAA ALERT**
In line with the new HIPAA regulations concerning protected health information, it is important that you understand that any case information you present from your work, will need to be de-identified. What this means is that any information that would allow another to identify the person needs to be changed or eliminated. This includes obvious things like names and birth dates but may also contain other information that is so unique to the person that it will allow for identification, including diagnosis, race/ethnicity, or gender. If diagnosis, race/ethnicity, or gender is directly related to the case presentation it can be included if it will not allow for identification.

CONFIDENTIALITY

Given the nature of classroom discussion and the presentation of case materials and at times personal revelation in class, students are reminded that the same commitment to confidentiality with clients extends to classmates. What is shared in class stays in class.

STUDENTS WITH DISABILITIES

Students with disabilities who are enrolled in this course and who will be requesting documented disability-related accommodations are asked to make an appointment with the Office of Disability Services, Rochelle Kohn, Beren Campus, 917-326-4828, rkohn1@yu.edu, Abby Kelsen, Wilf Campus, 646-685-0118, akelsen@yu.edu, during the first week of class. After approval for accommodations is granted, please submit your accommodations letter to Disability Services Office immediately.

E-RES (Electronic Reserve)

Most of the articles mentioned in the curriculum are available on electronic reserve [E-RES]. You can access the full text articles from your home or from a university computer at no charge.

How do I Use E-RES?

1. Go to the library’s online resources page: http://www.yu.edu/libraries/online_resources.asp
2. Click on E-RES. If you are off-campus, at this point you will be prompted for your Off Campus Access Service login and password.
3. Click on “Search E-RES” or on “Course Index,” and search by instructor’s name, department, course name, course number, document title, or document author. [Mason]
4. Click on the link to your course.

5. Enter the password 6682M

6. Locate and click on the item you wish to view. Titles beginning with "A", "An", or "The" are alphabetized under "A" and "T" respectively.

7. When the article text or book record appears on the screen, you can print, email, or save it to disk.

To view documents that are in pdf format, the computer you are using must have Adobe Acrobat Reader software. You can download it FREE at www.adobe.com/products/acrobat/readstep2.html

ASSIGNMENTS: Doctoral Students

1. Students will provide an annotated bibliography of at least 10 references related to an evidence-based topic of their choice. Examples of such a topic are: interventions for a specific disorder, access to mental health services, the ethnic, religious or ideological basis for mental health service interventions, interventions for specific groups such as veterans, vulnerable groups such as people with physical or mental challenges, etc. All submissions should be sent to me by e mail as an attachment in Word. The date for the submission will be announced but it will be close to the 7th on-line class session. (Learning Objectives: 1-11).

2. Poster Session: Students will choose a specific intervention related to individuals with a diagnosis of serious mental illness and create a poster that summarizes the intervention; its goals, targets & desired outcomes; the nature of the evidence supporting the intervention; and what future research needs to focus on to enhance its level of empirical support, or to demonstrate its effectiveness. Posters using Power-point should be of professional quality and should contain: an introduction to the problem; a review of past and current knowledge; a detailed presentation of 3 studies on the subject (taken from the literature) and a summary, and reference page(s). Submissions should be sent to me by e mail at a date to be announced, close to the last on-line class session. (Learning Objectives: 1-11).

Please Note: All work must be completed on time. A grade of Incomplete will not be given except in very unusual and documented circumstances. If any of the assignments is not received the student will receive a reduced grade based on completed work.

GRADES
Grades will be based on assignments and the number of log-ins to the on-line platform, deemed as class participation:

Assignment 1 = 40%  
Assignment 2 = 40%  
Class Participation = 20%

READINGS

**Required Text and Course Books:**

**Optional Course Books (at your discretion).**

IMPORTANT COURSE RESOURCE

The EBP Project website – includes the course syllabus, fidelity scales, class exercises, participating schools, and project faculty forms: [www.omh.state.ny.us/omhweb/adults/swebp/faculty](http://www.omh.state.ny.us/omhweb/adults/swebp/faculty)

1. Established and Emerging Evidence Based Treatments

   Introduction to Evidence-based Practice and Evaluating Evidence

   Module Goals/Purpose:
• To provide students with an understanding of the meaning of evidence-based practice.
• To show the importance of using evidence-based practices with individuals with a diagnosis of serious mental illness.
• To provide students with an understanding of the different sources of evidences that can be used to support the evidence-based practice decision making process.
• To provide students with information about the criteria used to evaluate the quality of evidence used to inform the evidence-based practice decision making process.

Readings:

2. Changing ideas about mental illness and individuals diagnosed with Serious Mental Illness (SMI)

Module Goals/Purpose:
• To provide an overview of the epidemiology of mental illness and serious mental illness in the United States and throughout the world.
• To understand the meaning of mental illness.
• To understand how serious mental illness (SMI) differs from the term mental illness.
• To learn about prevalence and incidence estimates in US and throughout the world.

Readings:
3. The Recovery Model

Module Goals/Purpose
- To demonstrate a working knowledge of the recovery paradigm as it relates to working with individuals with a diagnosis of serious mental illnesses.
- To show evidence supporting the Recovery Movement
- To discuss stigma as it relates to mental illness
- To review policy and funding implications

Readings:

*NASW (National Association of Social Workers Recovery Model Snapshot)*
Link: https://www.socialworkers.org/practice/behavioral_health/0206snapshot.asp

4. Person-Centered Practice

Module Goals/Purpose:
- To define and operationalize the key concepts of person centered practices
- To understand the core-values of person –centered practice.
- To learn how person-centered practice and evidence-based practice can be connected.

Readings:
- Miller & Mason, Chapters 1, 2, 5, 6, 7.
Pros-Person Centered Recovery Workbook, Chapter 1.
Retrieved from:
https://www.omh.ny.gov/omhweb/pros/Person_Centered_Workbook/Chapter1.pdf

New York State Consumers, Survivors, Patients, and Ex-Patients (2004). Infusing recovery-based principles into mental health services, A white paper.
Commissioned by New York State Office of Mental Health.
Retrieved from:

5. First Break Intervention Strategies: Early Intervention for First Episode of Psychosis

Module Goals/Purpose
- To provide an overview of evidence that early intervention for schizophrenia and other primary psychotic disorders can improve clinical, social and occupational functioning for individuals experiencing first episodes of psychosis.

Readings:
Miller & Mason, Chapters, 3-4, 6, 8, 10-11.

6. Trauma and Serious Mental Illness

Module Goals/Purpose
- To learn about the role of trauma and serious mental illness as an area of emerging research.
- To understand how trauma informed care fits in with evidence-based practice.
- To learn how trauma is assessed and treated working with individuals with a diagnosis of serious mental illness.

Readings:

**Resources**

Also check out trauma treatment in other countries or in the region in which you practice by doing a google search.

### 7. Shared Decision Making and Working with Families

**Module Goals/Purpose**

- To demonstrate a working knowledge of shared decision making as it relates to those with illness.
- To demonstrate a working knowledge of the various approaches to working with families in the context of evidence-based practice.

**Required Readings:**

8. Motivational Interviewing

Module Goal/Purpose
- To demonstrate a working knowledge of the Motivational Interviewing (MI) framework and develop MI skills related to engagement, focusing, evoking, and planning.

Readings:

9. Cognitive Based Interventions

Module Goal/Purpose
- To demonstrate a working knowledge of cognitive based interventions as they relate to working with individuals with a diagnosis of serious mental illnesses.

Readings:

10. Wellness Self-Management

Module Goal/Purpose
- To demonstrate a working knowledge of Wellness Management as it relates to working with individuals with a diagnosis of serious mental illnesses.

Readings:

11. Supported Employment

Module Goal/Purpose
- Describe the importance of work for people with serious mental illnesses.
• Using evidence-based practices understand what matters most in work for people with serious mental illnesses.

Readings:
New York: W.W. Norton

**12 Integrated Treatment for Co-Occurring Disorders**

**Module Goal/Purpose**
12. To demonstrate a working knowledge of integrated dual disorder treatment as it relates to working with individuals with a diagnosis of serious mental illnesses.

Readings:

13. **The Organizational Context for Services**

**Module Goal/Purpose**
- To introduce social work students to integrated behavioral health systems as it relates to working with individuals with a diagnosis of serious mental illnesses.

**Readings:**

**Resources:**
14. Assertive Community Treatment (ACT)

Module Goal/Purpose
- To demonstrate a working knowledge of the Assertive Community Treatment (ACT) program as it relates to working with individuals with a diagnosis of serious mental illnesses.

Readings:
