COURSE DESCRIPTION
Social Welfare Organization, a prerequisite for SWK 6210, offered students a foundation to understand policies within the historical and political context and to describe current patterns of social welfare service delivery. Building on this knowledge base, the Social Policy course focuses on policy analysis, policy practice and advocacy.

The course is divided into three components. The first part is an overview of social work roles in policy practice and the organizational context in which such practice often takes place. The second concerns the process of policy formulation and implementation. Students are provided with the tools necessary to analyze and evaluate existing social welfare policies at the federal, state, local, and agency levels within a social justice framework. The third component concerns the skills needed to influence policy decisions, with particular attention to advocacy. Issues concerning the promotion of social justice as well as the value and ethical issues that social workers confront in social welfare policy development and implementation activities are explored. Students have the opportunity to study social policies of relevance to their own practice.

A prerequisite for this course is the successful completion of first year course work, including SWK 6210. This course builds on this foundation knowledge and skills, and further develops students’ understanding of the centrality of social welfare policy to the context of social work practice, reinforcing and expanding knowledge and skills developed in the Social Welfare Organization course. This course is consistent with a social work problem solving approach, as taught in practice and research courses. The course content also relates to the macro content sections of Human Behavior and the Social Environment and builds upon content infused throughout the curriculum related to social justice, equity, and equality for populations in need and at-risk.

I. SOCIAL WORK COMPETENCIES

This course will help students achieve the following competencies:

Competency 3: Advance Human Rights and Social, Economic, and Environmental Justice

Social workers understand that every person, regardless of position in society has fundamental human rights, such as freedom, safety, privacy, an adequate standard of
living, health care, and education. Social workers understand the global interconnections of oppression and human rights violations, and are knowledgeable about theories of human need and social justice and strategies to promote social and economic justice and human rights. Social workers understand strategies designed to eliminate oppressive structural barriers to ensure that social goods, rights, and responsibilities are distributed equitably and that civil, political, environmental, economic, social, and cultural human rights are protected. Social workers apply their understanding of social, economic, and environmental justice to advocate for human rights at the individual and system levels; and engage in practices that advance social, economic, and environmental justice.

To measure this competency, students will:
3A – Advocate for human rights and social and economic justice
3B – Engage in practices that advance social and economic justice

Competency 5: Engaging in Policy Practice

Students will understand that human rights and social justice, as well as social welfare needs and services, are influenced by public policy, as implemented at the federal, state, and local levels. Students will understand the impact of policy in service delivery and the influence of practice in policy development. They will understand the role of social work in policy development and implementation within their practice settings at the micro, mezzo, and macro levels, and how social workers can actively engage in policy practice to effect change within these settings. Students will recognize and understand the historical, cultural, economic, organizational, environmental, and global influences that affect social policy. Students will become knowledgeable about policy formulation, analysis, implementation, and evaluation.

Social workers identify social policy at the local, state, and federal levels that impacts well-being, service delivery, and access to social services. Social workers assess how social welfare and economic policies impact the delivery of and access to social services; and social workers apply critical thinking to analyze, formulate, and advocate for policies that advance human rights, and social, economic, and environmental justice.

To measure this competency, students will:
5A – Analyze, formulate, and advocate for policies that advance social well-being

II. INSTRUCTIONAL METHODS

Class sessions include lectures that follow the progression of the course outline. Discussions focus on lecture content, reading assignments, and current events relevant to social policy and student experiences in the field. A variety of techniques, including classroom exercises, audio-visual presentations and guest speakers may be used.
Students are expected to complete all assigned readings on time, attend class and participate knowledgeably in class discussions. *The New York Times, The Washington Post, The Wall Street Journal* or other national newspaper should be read daily.

VI. E-RESERVES

What is eReserve?

eReserve (Electronic Reserve) is Yeshiva University’s on-line web based system used to provide access to journal articles, book excerpts, and other course materials. Most articles listed in each syllabus are available on eReserve. You can access full text articles from your home or from a university computer.

How do I use eReserve?

1. Go to the library’s online resources page: http://www.yu.edu/libraries/
2. Click on online resources.
3. Click on eReserves
4. If you are off-campus, at this point you will be prompted for your Off Campus Access Service login and password (obtain this from the library).
5. In the 'search for Courses' box, type in the name of your course.
6. Click on the link to your course.
7. Enter the password given to you by your instructor (ALL UPPERCASE).
8. Locate and click on the item you wish to view. Titles beginning with "A", "An", or "The" are alphabetized under "A" and "T" respectively.
9. When the article text or book record appears on the screen, you can print, email, or save it to disk.
10. If you have any problems, please contact: eres@yu.edu.

VI. PLAGIARISM

Students should remember that the School will not condone plagiarism in any form and will sanction acts of plagiarism. A student who presents someone else's work as his or her own work is stealing from the authors or persons who did the original thinking and writing. Plagiarism occurs when a student directly copies another's work without citation; when a student paraphrases major aspects of another's work without citation;
and when a student combines the work of different authors into a new statement without reference to those authors. It is also plagiarism to use the ideas and/or work of another student and present them as your own. It is not plagiarism to formulate your own presentation of an idea or concept as a reaction to someone else’s work; however, the work to which you are reacting should be discussed and appropriately cited. Any student who can be shown to have plagiarized any part of any assignment in this course will automatically fail the course and will be referred to the Associate Dean for disciplinary action, which may include expulsion.

VIII. HIPAA ALERT
In line with the new HiPAA regulations concerning protected health information, it is important that you understand that any case information you present from your work will need to be de-identified. What this means is that any information that would allow another to identify the person needs to be changed or eliminated. This includes obvious things like names and birth dates but may also contain other information that is so unique to the person that it will allow for identification, including diagnosis, race/ethnicity, or gender. If diagnosis, race/ethnicity, gender is directly related to the case presentation it can be included if it will not allow for identification.
