

Evidence Based Practice Questionnaire (EBPQ)

APA (2006) has defined evidence-based practice (EBP) as “the integration of the best available research with clinical expertise in the context of patient characteristics, culture, and preferences.” We are interested in your experiences and views on EBP.

1. Date:

2. Using the APA definition, how often do you engage in evidence-based practice when offering psychological services (assessment, psychotherapy, etc.)?

% of my psychological service:

One difficulty of practicing EBP is staying abreast of the research presented in electronic, online sources. Please rate your current knowledge of the following online research databases.

3. Division 12's Empirically Supported Treatments:

- 1= low 2 3= moderate 4 5= high

4. PsycINFO

- 1= low 2 3= moderate 4 5= high

5. PubMed

- 1= low 2 3= moderate 4 5= high

6. Cochrane Database of Systematic Reviews

- 1= low 2 3= moderate 4 5= high

7. Database of Abstracts of Reviews of Effects (DARE)

- 1= low 2 3= moderate 4 5= high

8. SAMHSA's National Registry of Evidence-Based Programs and Practices (NREPP)

- 1= low 2 3= moderate 4 5= high

9. Center for Evidence-Based Medicine

- 1= low 2 3= moderate 4 5= high

Another difficulty of practicing EBP is understanding the results of sophisticated research. Please rate your current ability to understand the following research methods and designs.

10. Tests of statistical significance:

- 1= poor 2 3= moderate 4 5= high

11. Meta-analysis techniques:

- 1= poor 2 3= moderate 4 5= high

12. Measures of effect size:

- 1= poor 2 3= moderate 4 5= high

13. Test reliability:

- 1= poor 2 3= moderate 4 5= high

14. Confidence Intervals:

- 1= poor 2 3= moderate 4 5= high

15. Multiple regression techniques:

- 1= poor 2 3= moderate 4 5= high

16. Power of statistical tests and study designs:

- 1= poor 2 3= moderate 4 5= high

17. Odds ratios:

- 1= poor 2 3= moderate 4 5= high

18. Measures of selectivity and specificity:

- 1= poor 2 3= moderate 4 5= high

19. Randomized clinical trial designs:

- 1= poor 2 3= moderate 4 5= high
